Urgent Notice to all users of the Skaha Hills Water System (includes all residences and businesses in the Skaha Hills development; Riva Ridge; Holiday Hills; Nissan and International Bar Coding)

As this unprecedented heatwave has its firm grip on the region, we need your cooperation on an urgent matter.

Our reservoir is dangerously low. This will impact access to water for all users of the current infrastructure. This will also impact any response to fire mitigation, should the need arise.

As a result, starting immediately, the following water restrictions are to be implemented;

- Residents and businesses with their civic address ending in an even number may only use irrigation on Wednesdays and Sundays only. **Manual systems may water between 6am to 10am and 6pm to 10pm only. Automatic systems may water between 12:01am and 6am only;**
- Residents and businesses with their civic address ending in an odd number may only use irrigation on Tuesdays and Saturdays only. **Manual systems may water between 6am to 10am and 6pm to 10pm only. Automatic systems may water between 12:01am and 6am only;**
- Residents and businesses are asked not to wash motorized vehicles using this water system. We recommend taking your vehicles to washing stations located within the city of Penticton.

We recommend careful hand watering of outdoor plants to ensure water is not wasted while our systems are impacted.

If we continue to experience these extremely low reservoir levels the Penticton Indian Band may have to implement further restrictions as necessary in order to protect life, property and service infrastructure.

We hope the heat dome that has settled over our region will move along soon, until then, we thank you for your cooperation.
